Jim tels an that you have identified the record used on last night's AK Special on Hoover as 105-2255-4117. I/discres.

The ART story is that <u>before</u> the assaudantion the FR sent Chrids/Solo down to Guba and he came back with the fairy-tale that Canald had said he would kill JPK. Ander for the total impossibility of what ARC reports, there are problems with the content of 4117, regardless of what is excised from it.

Moover had Chillis' report long before the assessintation. But 4117 was not written until 6/17/64.

after the encision the Hower Letter to Continue on that the information, remains what is sixtured, is saidler to west Costro and him his most assessmention speech of 11/27/64. I've read that speech. I had a copy of the Spenion text, but account of it. Not only did Castro may no such thing, what he really said is quite opposite the Childs fabrication.

Vin comes to think that Easty was A.C's course. Have you may reason to believe be man? I ank because I don't revall any balles record in which anything like this is reported.

I'm aware of the fact that it is quite unlikely that FALMA would have sent such information enywhere after the/assassination, but how also could Hosty have known, if he did?

It was not easy, but in the JFK segment ABC succeeded in being very unfair to the FeT.

I gross I know now why legach phones to ask if she could come up and then didn't.

Despite the puffery, this function is not new. EXCA went into it. On cpast-to-coast TV yet.

Two Unrecorded copies are noted in this serial in the 105 file. The legible one is the Commission file. I can't make the other out.

Best Wiches,
